The American Academy of Pediatrics is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians. The American Academy of Pediatrics designates this educational activity for a maximum of 18.5 category 1 credits toward the AMA Physicians Recognition Award. Each physician should claim only those credits that he or she actually spent in the activity.

Pediatric Hospital Medicine 2005 has been designed as an educational forum for pediatric hospitalists and any clinician involved in the care of pediatric inpatients. This four-day meeting will enhance their knowledge of multiple aspects of pediatric hospital medicine and will help them in promoting better pediatric inpatient care. This meeting stems from the 2003 APA meeting Pediatric Hospitalists in Academic Settings. This is the first all encompassing meeting for pediatric hospitalists and is jointly sponsored by The Ambulatory Pediatric Association, The American Academy of Pediatrics and The Society of Hospital Medicine. The format of this meeting will bring pediatric hospitalists from multiple venues together and will provide the opportunity to network and to discuss as well as influence the state of this rapidly evolving and exciting field of medicine.

The goal of each session is to increase/enhance the participants’ knowledge in the areas of clinical medicine, practice management, education, and research specifically as they relate to pediatric hospital medicine. The knowledge acquired will help individual hospitalists improve their practice and will also promote the necessary skills required to move the field of hospital medicine forward.

At the conclusion of this educational activity the participant should be better able to:

- comprehend new information and skills in various areas of the clinical practice of pediatric hospital medicine.
- apply knowledge gained and implement advances in the practice management, systems and logistics areas of pediatric hospital medicine.
- understand new tools for teaching and practicing pediatric hospital medicine.
- identify opportunities and mechanisms for hospitalists to conduct pediatric inpatient research.
- advocate and influence the evolution of pediatric hospital medicine.

The American Academy of Pediatrics is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The American Academy of Pediatrics designates this educational activity for a maximum of 18.5 category 1 credits toward the AMA Physicians Recognition Award. Each physician should claim only those credits that he or she actually spent in the activity.

This activity is acceptable for up to 18.5 AAP credits. These credits can be applied toward the AAP CME/CPD Award available to Fellows and Candidate Fellows of the American Academy of Pediatrics.

To address in a manner sufficient to enable participants to better understand:

- clinical issues involving pediatric inpatients including sedation, care of the medically complex child, and current hot topics as well as how to develop best practice guidelines.
- practice management including coding and billing; job skills such as contract negotiating and consulting; and career skills such as academic advancement and preventing burnout.
- the role of the hospitalist in medical education including how to use and teach evidence based medicine, specific teaching techniques, and developing an inpatient curriculum.
- basic concepts in clinical research, how to turn QI into research, and methodologies of educational research.
Who Should Attend?

Pediatricians who focus on the medical care of hospitalized pediatric patients, department chairs, program directors, directors of general pediatric divisions, general pediatric residents, nurse practitioners and physician assistants.

Location

Embassy Suites Hotel Downtown Denver will be the location for Pediatric Hospital Medicine 2005. The hotel is located just steps from the lower downtown historical district, the 16th Street Mall, shopping, galleries, restaurants and sporting events.

Embassy Suites Hotel Downtown Denver
1881 Curtis Street
Denver, CO  80202
www.esdendt.com

Reservations for sleeping rooms must be made by individual attendees directly with the hotel’s reservation department (800–733–3366). Sleeping room rates of $129 are available to meeting attendees; remember to mention Ambulatory Pediatric Association (APA). Reservations must be received on or before Tuesday, July 5, 2005 in order to guarantee the discounted room rate. Room rate includes full breakfast each day and complimentary happy hour each evening.

Ground Transportation

Transportation from Denver International Airport to Embassy Suites Downtown Denver is easiest by taxi or shuttle. A ride from Blue Sky Shuttle Company (www.blueskyshuttle.com or 303–300–2626) will cost $16 one-way or $30 round-trip to the hotel. Shuttle reservations are recommended. A taxi will be approximately $30 one-way.

Cancellation Policy

Cancellation of registration cannot be accepted by phone. All cancellations must be in writing.
✧ A $50 fee will be assessed for cancellations received by June 30, 2005.
✧ No refunds will be issued after June 30, 2005, except in the case of an emergency.
✧ All refunds will be processed after the meeting.

Colorado Rockies Baseball Game

We have planned an outing to Coors Field Saturday evening to see the Colorado Rockies play the Philadelphia Phillies. The game begins at 6:10pm, the ticket price is $38. We have secured a limited number of terrific seats in section 132 available on a first come first served basis. You can view Coors Field at http://colorado.rockies.mlb.com/NASApp/mlb/col/ticketing/col_seating_pricing.jsp, then click on section 132 to see the view from our seats. Coors Field is a six block walk from the hotel, or you can take a taxi.

Registration Fee

The registration fee includes the opening reception, three lunches and CME credits.
**Keynote Address**

**How Hospitalists Will Create the Hospital of the Future – Larry Wellikson**
The keynote address will cover the current status of hospital medicine on a national basis. Growth of the hospital movement will be highlighted with emphasis on the role hospitalists play in providing quality, integrated care and leading system’s change. Future directions of hospital medicine as a specialized field will be discussed, emphasizing the current deliberations in adult hospital medicine.

**Plenary Topics**

**PRIS/Networking – Chris Landrigan**
Moving the field of inpatient pediatrics forward will require generating new evidence on how best to treat inpatients with various conditions (evidence-based medicine) and how to translate those findings quickly into the practice of hospital medicine. This session will describe how the Pediatric Research in Inpatient Settings (PRIS) network functions. Key issues, an agenda on how to accomplish these goals and information on how to become involved will be presented by Dr. Chris Landrigan, Chair of PRIS, Research Director of Inpatient Services at Children’s Hospital, Boston and a practicing hospitalist/health services researcher focusing on medical errors in inpatient settings among other things.

**Future Directions: Becoming a Sub-board vs. Pursuing Competencies – Steve Ludwig, Larry Wellikson, Doug Carlson and Mark Joffe** are all critical leaders in their fields and will cover these and other related issues in this exciting plenary session. **Moderator: Dan Rauch.**

Pediatric hospital medicine has changed significantly in the last five years. Several key organizations have started to respond to their members needs, fellowships are being developed, research is becoming established and the number of pediatric hospitalists is rapidly growing. Many questions remain: Is pediatric hospital medicine a new specialty? Is there a distinct difference in the knowledge base between outpatient and inpatient pediatrics? Should pediatric hospital medicine be a board certified specialty or one with an added qualification? What needs to happen in the short- and long-term for this to be a viable career/specialty option? These questions will be addressed during this session.

**Workshop Topics**

Workshop topics will include four major areas of Pediatric Hospital Medicine:

- Clinical Issues
- Education
- Practice Management
- Research
- Clinical Issues
- Practice Management
- Research
- Education

**Wrap-up Session**

The session will provide opportunities for audience and speakers to engage in dialog on the future directions pediatric hospital medicine should take including research agenda, teaching agenda, clinical care issues to focus upon, and the professional development of the field. The strengths and weaknesses of the 2005 Denver program will be discussed, and preliminary plans for a future meeting developed.

**Program Committee**

Maggie Hood, MD  
Laura Mirkinson, MD  
Jack Percelay, MD, MPH

Dan Rauch, MD  
Raj Srivastava, MD, MPH  
David Zipes, MD
### Schedule

#### Thursday, July 28

|            | III. Developing a Curriculum – Vinny Chiang, Tim Cornell, Lisa Zaotis |
| 5:30pm     | Depart for Colorado Rockies Game (Optional)                          |
Workshop Descriptions

While workshops will occur in concurrent sessions, each will be offered in multiple sessions, thus allowing greater opportunity for attendance.

**CLINICAL ISSUES**

1. **Hospitalist Run Sedation Services – Doug Carlson**
   This workshop will focus on the systems necessary to develop, implement, sustain and maintain a hospitalist run sedation service. The session will emphasize training requirements for hospitalists as well as the systems and safeguards necessary for an effective program. Clinical aspects and billing aspects of a sedation service will also be discussed.

2. **Pathways: A Critical Tool for Hospitalist Success – Steve Muething**
   This workshop will present examples of the lessons learned at Cincinnati Children’s Hospital with their exemplary development of inpatient pediatric pathways (available on-line at www.guidelines.gov.) The workshop will not emphasize a particular clinical topic but will instead focus on the processes of developing consensus, buy-in, overcoming obstacles, gaining support of all members of the healthcare team, implementing systems change, monitoring progress, and conducting on-going quality improvement.

3. **Troubleshooting Lines, Tubes and Catheters – Mark Joffe**
   This workshop will provide nuts and bolts information the hospitalist needs to manage the range of access and egress devices encountered on the pediatric ward. Areas appropriate and inappropriate for hospitalist intervention will be discussed and demonstrated. Topics will include repair of PICC lines and broviac catheters, thrombolytic therapy for catheter occlusion, G-tube management, VP shunt assessment and trach tubes.

4. **Hospital Care of the Technologically Dependent Child – Raj Srivastava**
   This workshop will focus on clinical aspects involved in the care of the technologically dependent, hospitalized child. Items covered will include respiratory status and pulmonary toilet, feeding and nutrition, physical therapy, psycho-social considerations and emotional well-being. Integration with the medical home and transitions of care will be emphasized. New technologies and therapeutic modalities that the hospitalist can expect to encounter will be reviewed.

5. **Top 10 Topics in Pediatric Hospital Medicine 2005 – Erin Stucky**
   This workshop will provide an overview of advances in the clinical and systems practice of pediatric hospital medicine in the year 2005. Topics are selected from an extensive review of the literature, identification of hot topics from the LISTSERV, and on-going surveillance of the activities of professional organizations impacting pediatric hospitalist practice.
TEACHING
1. Evidence Based Medicine – How to Use and Teach – Vinny Chiang, Mary Ottolini
   This workshop will give a brief review of evidence based medicine and then explore how to incorporate evidence based medicine into the practice of hospital medicine and how to teach evidence based medicine to others.

2. Teaching Techniques: Evaluation, Feedback and Teachable Moments – Vinny Chiang, Dan Rauch, Lisa Zaotis
   This workshop will review basic components of evaluation and feedback as well as the necessary skills for teaching within the hospital setting.

3. Developing a Curriculum – Vinny Chang, Tim Cornell, Lisa Zaotis
   This workshop will discuss how to develop a hospital medicine focused curriculum with attention to institutional priorities and ACGME competencies.

PRACTICE MANAGEMENT
1. Coding and Billing – Sandy Melzer and Yong Han
   This session will highlight common billing, coding and documentation issues dealt with in everyday hospitalist practice including initial and subsequent hospital days, observation codes, common procedure codes and consulting codes. Strategies to safely maximize reimbursement will be discussed as well as common pitfalls in appropriate billing and documentation.

2. Contract Negotiation, – Coverage Models and Funding (Support/Subsidy) – Sandy Melzer
   This session will review some of the available statistics on the various hospitalist coverage, compensation and productivity models and will cover both academic and community programs. The pros and cons of the various models will be discussed. Contract negotiating strategies will be covered and the idea of subsidy will be discussed in light of the value hospitalists add to the system.

3. Career Advancement/ Preventing Burnout – Dan Rauch, Mike Ruhlen
   This session will explore the principles in creating longevity and career satisfaction in hospital medicine. Key concepts in physician retention and burnout will be described using lessons from other fields and from existing research in the field of hospital medicine. Academic career advancement for the hospitalist will also be discussed.

4. Being a Consultant – Erin Stucky
   This session will discuss the hospitalist as a consultant and will cover the common pitfalls of this role. Effective communication strategies including verbal and written will be discussed. The idea of “attending” verses “consultant” and the advantages of each role will be discussed. Questions such as “whose service should the patient be on?” will be answered.

RESEARCH
1. Opportunities and Mechanisms for Conducting Inpatient Research – Chris Landrigan, Raj Srivastava
   This workshop will discuss the core components needed to conduct quality inpatient research and how to use opportunities locally to pool resources together. Experiences from two large pediatric teaching hospitals will be discussed, as well as integration with quality departments, statistical analytical resources, career options for hospitalists interested in research and how to work with groups at a national level.

2. Educational Scholarship: Sharing Resources and Developing Research – Mary Ottolini
   This workshop will focus on educational scholarship for hospitalists. We will define scholarship and discuss how hospitalists can advance the field of medical education and their own careers as educators by investigating questions that arise about teaching in the inpatient setting, or sharing educational resources. We will discuss how to document scholarship using an educator’s portfolio.
Faculty

Douglas W. Carlson, MD is the director of the Pediatric Hospital Medicine Program at St. Louis Children’s Hospital and an Associate Professor of Pediatrics at Washington University. Dr. Carlson is boarded in Pediatrics and Pediatric Emergency Medicine. All of his clinical and administrative time has been spent in the area of pediatric hospital medicine since 1997.

Vincent W. Chiang, MD is chief of inpatient services at Children’s Hospital Boston. He is board-certified in both pediatrics and pediatric emergency medicine. He also directs the core pediatric clerkship and serves on both the Council of Educational Policy and the Academy at Harvard Medical School. He has interests in medical education and hospitalist program administration.

Tim Cornell, MD, is currently faculty of the Hospitalist Consultation Service at the University of Michigan, where he recently moved to after many years in Greensboro, NC. He is an active member of the Society of Hospital Medicine, serving as chair of the Pediatrics Committee, co-chair of the Pediatrics Core Curriculum Task Force, and a member of the Education Committee.

Mark D. Joffe, MD trained in Pediatrics and Pediatric Emergency Medicine at The Children’s Hospital of Philadelphia. He spent nine years at St. Christopher’s Hospital for Children working in the Emergency Department, where he became director in 1990, and as an inpatient attending on the General Pediatrics service. In 1997 he joined the faculty at CHOP as Director of Community Pediatric Medicine, managing four satellite inpatient hospitalist programs, as well as attending in the Emergency Department.

Christopher Landrigan, MD, MPH is Research Director and Fellowship Director of the Children’s Hospital Inpatient Pediatrics Service at Children’s Hospital of Boston. Dr. Landrigan designed a fellowship that combined further training in inpatient pediatrics with research training through the Clinical Effectiveness Program at CHB. He completed an M.P.H. at the Harvard School of Public Health and took a faculty position at Children’s Hospital and Harvard Medical School. He conducts research on pediatric hospitalist systems and patient safety. Dr. Landrigan is chair of the PRIS hospitalist research network.

Stephen Ludwig, MD is the Associate Chair for Medical Education at the Children’s Hospital of Philadelphia (CHOP) and Professor of Pediatrics at the PENN medical school. As former Division Chief of General Pediatrics at CHOP, Dr. Ludwig initiated a number of hospitalist programs at community hospitals that support CHOP. He also supported a hospitalist fellowship program in the early 1990s. Dr. Ludwig is a Past President of the APA. He is the co-editor of Pediatric Emergency Care, a journal which now features a Hospitalist Section.

Sanford Meltzer, MD, MBA is the Vice President for Practice and Regional Affairs at Children’s Hospital and Regional Medical Center in Seattle, Associate Professor of Pediatrics at the University of Washington School of Medicine and a member of the American Academy of Pediatrics Committee on Hospital Care. Combining a clinical background as a hospitalist with experience in administration, Dr. Melzer brings expertise in the financial aspects of hospitalist programs and works with physicians and hospitals to develop economically viable models of clinical hospitalist care.

Stephen E. Muething, MD is an Associate Professor of Pediatrics at the University of Cincinnati and Associate Director of Clinical Services at Cincinnati Children’s Hospital where he is responsible for the clinical section of General Pediatrics. This includes over 60,000 primary care visits and over 2500 inpatient admissions. Dr. Muething has special interests in improved coordination of care in the primary care office, hospitalist care, electronic medical record, immunization registry, health care improvement and family education via the media.
Mary Ottolini, MD, MPH is an Associate Professor of Pediatrics at George Washington University and Director of Medical Student Education in Pediatrics for GWU and Children’s National Medical Center, as well as the Hospitalist Division Chief. She has developed a variety of roles for hospitalists in community hospitals, and within the academic medical center. In July 2003 she began the first hospitalist training program at CNMC. She directed a practice-based research network and is currently on the PRIS Steering Committee. She was named an APA Faculty Development Scholar and has received numerous awards for teaching and educational research. She is editor for the “Broad Professional Competency” section of the APA Residency Guideline Revision Project. She completed a Certificate program in Medical Education at GWU this year.

Jack Percelay, MD, MPH has been a community-based pediatric hospitalist for over 12 years, multi-tasking in a number of settings including the general pediatric inpatient ward, the pediatric intensive care unit, the neonatal intensive care unit, labor and delivery and the emergency room. He has chaired the AAP Section on Hospital Care since its inception and is also a member of the AAP Committee on Hospital Care as well as the PRIS Steering Committee. He is the pediatric representative on the SHM Board. His non-clinical interests focus on pediatric hospitalist systems of care.

Daniel Rauch, MD is an Associate Professor of Clinical Pediatrics at New York University and Director of Inpatient Pediatrics. His hospitalist activities include being co-founder and current co-chair of the APA Hospital Medicine SIG, being a member of the Pediatric Research in the Inpatient Setting Steering Committee, participation in the Benchmarks Committee of the Society of Hospital Medicine and a member of the AAP Section on Hospital Medicine Executive Committee.

Mike Ruhlen, MD is a graduate of the University of Cincinnati College of Medicine and trained in Pediatrics at the Children’s National Medical Center. He also maintains a subspecialty interest in the field of Child Abuse and Neglect, and is Board certified by the American Board of Quality Assurance and Utilization Review Physicians with several sub-specialty certifications. He has been a practicing pediatric hospitalist since 1989. He is currently the Vice President, Medical Affairs and Director of the Pediatric Hospitalist Service at the Toledo Children’s Hospital. He served on the AAP steering committee of the Provisional Section on Hospital Care, and has been a member of the committee now called the Executive Committee of the Section on Hospital Medicine. Dr. Ruhlen served on the Board of Directors of the National Association of Inpatient Physicians (now SHM) and its Leadership Task Force, Nominations Committee and Awards Committee.

Raj Srivastava, MD, MPH completed his Associate Chief Residency at the Hospital for Sick Children in Toronto and Fellowship in Health Services Research at Boston Children's Hospital while obtaining a Masters in Public Health from the Harvard School of Public Health in 2000. He is currently an academic pediatric hospitalist at the University of Utah and Primary Children’s Medical Center in Salt Lake City. The hospitalist system is within a Division of Inpatient Medicine and has a focus on medically complex children. He has experience as a Medical Director of an inpatient unit and is a health services researcher studying the impact of an academic pediatric hospitalist system on the quality of inpatient care and methods to best translate clinical research findings into practice in inpatient settings.

Erin Stucky, MD serves as a Director of Graduate Medical Education and an Associate Clinical Professor in the UCSD Department of Pediatrics. Dr. Stucky is an active inpatient hospitalist at the Children's Hospital and Health Center San Diego. The pediatric hospitalist program at CHHC admits almost 80% of the general pediatric admissions, with ~ 3000 admissions yearly. Additional hospitalist activities include emergency transport coordination, hospital bed triage, and active participation on key hospital committees. Dr. Stucky oversees the UCSD pediatric inpatient teaching program, which is fully integrated with CHHC. In addition, she serves as physician advisor to CHHC Quality Management and Patient Safety. Research includes an AHRQ medication error grant, Hispanic cultural grant, and Numax clinical trial.

Larry Wellikson, MD is the Chief Executive Officer of the Society of Hospital Medicine (SHM), a position he has held since January 2000. Dr. Wellikson is Board certified in Internal Medicine. He has served as
a Trustee of the American Society of Internal Medicine and a Regent of the American College of Physicians. He is on the faculty at the University of California at Irvine Medical School. Dr. Wellikson has been a featured speaker on the topics of hospitalists and the emerging specialty of Hospital Medicine, managed care, physician integration, and physician empowerment. He has helped hospitals, physicians, medical groups, pharmaceutical companies, and national organizations understand the current medical environment and fashion strategies unique to their industries to succeed in the future.

**Lisa Zaoutis, MD** is an academic pediatrician dedicated to the care of hospitalized children. She is currently the Director of Inpatient Services for the Division of General Pediatrics at The Children’s Hospital of Philadelphia. Her areas of particular interest include resident and nursing education and advancing General Pediatric Hospital Medicine as a recognized area of expertise in medical and nursing disciplines. She has received numerous teaching awards including the Faculty Teacher of the Year from CHOP (2002) and from Thomas Jefferson/A.I. DuPont Hospital for Children (1999) and the Penn Pearls Teaching Award from the University of Pennsylvania School of Medicine (2003).

**David Zipes, MD** has been a full time pediatric hospitalist since completing pediatric residency training in 1996. He is currently the director of a five-physician pediatric hospitalist group at St. Vincent Children’s Hospital in Indianapolis, Indiana. He is a member of the Society of Hospital Medicine’s board of directors and is actively involved in their pediatric committee and pediatric core curriculum task force. He has been actively involved in the AAP’s Section on Hospital Care and the developing PRIS network. He authored chapters in the already published Pediatric Hospital Medicine textbook and has contributed sections to a soon to be published pediatric hospital medicine textbook.
